

Introduction to McAfee Unified Cloud Edge Training Essentials

McAfee® Education Services eLearning Course

The McAfee® UCE training course provides an overview of how McAfee Unified Cloud Edge provides a framework to offer data protection and threat defense between device and cloud. This course also covers the various data loss prevention (DLP) classifications and the different web policies associated with the product.

Audience

IT security, incident management team, and applications team

Recommended Pre-Work

It is recommended that students taking this course also go through the Introduction to McAfee® MVISION Cloud Essentials course. It is also recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services.
